Mets Board Teleconference

Thursday, July 26, 2012

Attending: Richard Gartner, Thomas Habing, Jukka Kervinen, Betsy McKelvey (recording), Sébastien Peyrard, Jenn Riley, Brian Tingle, Robin Wendler

METS Board at DLF Fall Forum
- Our pre-conference meeting takes place on Friday, November 2.
- Agenda
  - Data model is probably most important
  - Copyright and licensing for Primer and Schema Documentation

Wiki Problems
- Problems persist with SocialText wiki; this free service seems to be broken, can't add users
- Possibility of migrating key content and/or having prospective and retrospective wikis.
- Need public and private spaces
- Leah will research new tools

Licensing and Copyright for Primer and Schema Documentation
Nancy is working on a document that maps METS to the newly approved IEEE Ramlet Core standard and needs copyright clearance for METS Primer and Schema Documentation that will be included in the Ramlet/METS mapping. Primer is copyright to DLF. IEEE has a formal letter for copyright clearance.

Action: Leah will contact Rachel Frick and work with Nancy on this. We can talk about the possibility of using a Creative Commons license at our meeting in Colorado.

Projects/Tools listed on LC site
Links are old. Leah will poll community to see if links should remain and if there are updated project/tools that should be added. May ask on code4lib as well as METS list.
